BRAND LY

User Guide

Hi there awesome designer!

Thank you for downloading BRANDly One Page,a tool that will help you create fantastic prototypes for your websites.

BRANDly is created with fully editable components on a 1170 grid,so you can create awesome websites in no time. Images we were using are free,CC0 images and you can download them all from these websites: Pixabay , ISO Republic and The Stocks .

You can download free Google fonts we were using here and here.

Every single layer and folder is properly named,so you don't have to lose any time on re naming them. Developers will love you for that,because it saves them a lot of time as well.

Please check out our other free or premium products,as well as free to use CC0 images by visiting our website www.webdonut.net

Freebies and free to use CC0 images

On our website www.webdonut.net we have a section with free to use CC0 images.

That means that you can use these images in any project,personal or commercial,free of charge and you don't have to link back to us. We would love if you do,but it's up to you.

Also,there are some free products,and there are free samples of all our products. You can use them as well both for personal and commercial use.

LICENCE: You can use any of our products and images,for unlimited number of projects,both personal and commercial. Only thing you are not allowed to do is re sell them as a whole,or any of their components.

HAVE FUN DESIGNING!
